

“Why My Vote Matters”

My vote matters, because it is one of the many ways I can help assure my voice is heard and my support of a movement or choice I believe in is expressed. I want to support development or progress that I believe in, and by voting I am helping myself reach that goal. One of the celebrated freedoms in America, freedom of speech, is what voting is based off of. It gives citizens the right to voice their opinions about government and what they want and think without any restrictions. This is important when it comes to voting, because you need to be able to speak your own mind and think your own thoughts. I cannot wait until I can vote. Voting will give me a feeling of power and freedom that I am participating in my community and country, and it will make me feel proud to express my decision. It will also have an impact on me because it will show me that I can speak up for what I believe in. Voting, can give you the power to believe in yourself because you are speaking up for yourself. This key aspect of life makes me want to vote and make my voice heard. Voting is also part of a form of government called Democracy, where citizens get to choose and vote on what they want and believe is best for our country and our community.

This matters because every citizen is heard and gets a chance to speak up. The significance of voting is quite clear. It gives people their freedom of speech, and it lets the people decide what they want in their community and their country. When citizens do not have the chance or option to vote, they are often unhappy that they do not get to speak their opinion. Citizens who do get to vote should take advantage of that opportunity and speak their voice about matters they care about. I believe that my vote matters because it gives me the freedom of speech, gives me the opportunity to make a change in my world and it gives me the chance to

vote for what I believe in and what I feel strongly about. I cannot wait to have my voice be heard by my community and country.
